

Project Manager Injection Molding Technology (m/f)

(part-time employment and home office possible)

LAPP Tec AG is a company of the German LAPP Group and is based in **Diessenhofen, Switzerland**. With 50 employees, we develop, produce and sell sophisticated plastic injection moulding solutions for the internationally active LAPP Group and for other international customers outside the group.

In order to implement our guiding principle "**From the idea to series production - partner for sophisticated injection molding solutions**", we rely on the highest quality standards, close customer relationships and innovative production solutions.

The **project management team** plays a key role in the realization of customer projects and the development of new products. To strengthen our team, we are looking for a colleague as **project manager for injection molding technology**.

As a **specialist and project manager**, you will be responsible for customer projects and you will support the company in its **technological development**. You are also the contact person for employees from sales and production.

The close cooperation with **technology partners**, with institutes and universities as well as with the **development departments of our customers** is part of your everyday life.

We expect a **technical vocational training with a degree from a university of applied sciences, additional studies in plastics technology (CAS / MAS)** are desirable.

Many years of professional experience in **plastic injection molding production** and proven competence in **project management** are required. Knowledge of the requirements for suppliers to the **food packaging or automotive industry** is an advantage.

You have **3D CAD** user knowledge and are used to working with an **ERP system** (e.g. SAP). A very **good knowledge of German and English**, both spoken and written, is also required.

Challenging tasks await you in an **exciting injection molding technology environment** (in mold labelling, co-injection, thin-wall technology, ...) combined with a **high degree of automation**.

You will find more information about our company on our website at **www.lapptec.com**. We are looking forward to your application and are at your disposal for further information!

Please send your applications by e-mail to **Mr Remo Kohler**, Head of HR – **bewerbung@lapptec.ch**
